2025 Q1 Exchange Review Result

Exchange Review – Eligibility Criteria for Exchanges

An exchange should meet the following criteria to be eligible:

- Within the top 20 volume rank* for the latest consecutive two quarters at the time of review.
- Support trading for crypto assets and tokens vs USD/BTC/USDT/USDC
- Data available for at least 50% of total no. of constituent coins
- Provide a market data feed via API to source data on an ongoing basis including price, volume and time stamps
- Stable service operations and in business for at least 12 months
- Information about the exchange will have to be available in English

The top 8 exchanges in terms of volume rank* that meet the aforementioned criteria will be selected.

Concentration rule

- The population of selected exchanges should represent at least (1) founders from 3 countries (2) 3 geographic location in terms of origin of the exchange. If the population of selected exchanges do not meet this criterion, the exchange comes in the lowest volume rank will be considered to be replaced by the next volume rank exchange and so on.

* according to previous 90 days trading volume at time of review

Exchange Review – Selected Exchanges for 2025 Q1

Selected Exchanges for 2025Q1*	2025Q1 Average Daily Volume (% Global Volume Coverage)	Headquarter	Security Rating
Binance	\$24024339379 (10.60%)	Cayman Islands	AAA
Bybit	\$6045370601 (2.67%)	Dubai	AA
Coinbase Exchange	\$4651567278 (2.05%)	United States	AAA
OKX	\$3998329932 (1.76%)	Seychelles	BBB
Gate.io	\$3984690640 (1.76%)	Cayman Islands	AA
Bitget	\$3259339283 (1.44%)	Seychelles	AAA
Bitrue	\$3205920012 (1.41%)	Singapore	BBB
WhiteBIT	\$2951103951 (1.30%)	Lithuania	AAA

We propose to remove the following exchanges:

1. **Upbit**
2. **DigiFinex**

Rationale:

Upbit-low exchange pair coverage; only 1 BTC/USD pair coverage and no USD/USDC/USDT/BTC coverage for other coins.

DigiFinex - out of top-30 in terms of volume coverage over past 90 days.

From 2025 Q1, the number of exchanges is kept at 8, hence no new exchanges are added.

*As of 24th March 2025

 New Additions

Total Average Daily Volume: \$52,120,661,076
(22.996% of total crypto volume).
It decreased 25.739% compared with \$70,185,454,304 of 2024Q4

Source: IX Asia Indexes, data as of 24/03/2025

Exchange Review – Ineligible Exchanges

Ineligible Exchanges 2025Q1*	2025 Q1 Average Daily Volume	Rank
Zedcex Exchange	\$9119226154	2
Crypto.com Exchange	\$7092824241	3
IndoEx	\$4891071931	4
SuperEx	\$4804680390	5
Fameex	\$4135887916	6
IBIT Global	\$4011215434	7
BTCC	\$3794423294	9
BiKing	\$3750058838	10
Total	\$41599388198	

These 8 major exchanges within top-10 exchanges by Average Daily Volume in 2025 Q1, failed to qualify as one of the 8 constituent exchanges for IXAI.

These 8 exchanges cover 18.35% of total cryptocurrency daily volume.

These exchanges failed our screening criteria of consistent performance over past 3 quarters, had low price update frequency or unstable api connections.

Source: IX Asia Indexes, data as of 24/03/2025

For more information, please refer to the exchange review Q1 2025 report.

Exchange Dissemination Intervals

Methodology:

1. Use API call. The response of API call to fetch ticker data mostly includes time value.
2. Hence for dissemination interval, the time taken between two consecutive time value from the response is measured.
3. In case if there is no time value in the response, API request time is recorded and measure the time taken until next request time where its response has price change from the previous price. In this case, track for 5 mins and take the minimum time as price value may not be updated if low transaction volume.

Selected Exchanges for 2024Q4*	Dissemination Interval				Headquarters Location

Introduction to ixCrypto Index Methodology

Introduction to ixCrypto Index (“IXCI”)

Basics of IXCI

Base Date: 3 December 2018

Launch Date: 12 December 2018

Base Value: 1,000

No. of Constituents: 25

Update frequency: Quarterly

Dissemination: 5 seconds, 24x7

IXCI Description

The ixCrypto Index (“IXCI”) serves as a market benchmark that reflects the overall performance of the largest and most liquid cryptocurrencies listed in the world.

The IXCI is a free float-adjusted market capitalisation weighted index with a 40% cap on the weighting of individual constituent cryptocurrency. The real time index was launched on 19 November 2020 through Nasdaq GIDS at a 15 second interval. Information vendors and fund managers could also subscribe our real time index data feed via our API and real time weightings directly from IX Asia Indexes.

Constituent Eligibility

Criteria 1:

It must fit the definition of a “cryptocurrency” as per the Wikipedia definition.

*“A Cryptocurrency (or crypto currency) is a digital asset designed to work as a medium of exchange wherein individual coin ownership records are stored in a ledger existing in a form of computerized database using strong cryptography to secure transaction records, to control the creation of additional coins, and to verify the transfer of coin ownership.” – Wikipedia**

Criteria 2:

The cryptocurrency must be traded publicly, **and** active traded on at least two (2) exchanges

Selection Criteria

1

The cryptocurrency should be among the top n% free float adjusted market capitalization (“adjusted MC”) where n represents the total percentage after including the last eligible cryptocurrency and such percentage is targeted to achieve 80%.

2

The cryptocurrency should rank within an acceptable range in accordance with the Volume Buffer Rule in terms of 90-day average trading volume. The acceptable range under the Volume Buffer Rule varies in accordance with the number of existing constituents (x2.5 existing constituents rounded to increments of 25)

3

If the cryptocurrency in top N in terms of adjusted MC cannot meet the liquidity requirement, it will be kicked out and replaced by the next one or more eligible cryptocurrencies until the total coverage exceed 80%.

Only when a cryptocurrency satisfies all 3 criteria and does not impose a conflict of interest* will it be considered to be included as a constituent in IXCI

Index Review

1

Quarterly Review

2

Buffer Rule

3

Constituents
Enhancement Rule

4

Fast Entry Rule

(1) Quarterly Review and Announcement Schedule

Review Schedule

IX Asia Indexes Undertakes regular quarterly reviews of IXCI constituents with **data cut-off dates** of the last day of March, June, September, and December of each year.

Announcement dates of constituent changes will be **the second Friday** after the cut-off dates of March, June, September, and December of each year.

Effective dates of constituent changes will be **the third Friday** after the cut-off dates of March, June, September, and December of each year.

(2) Buffer Rule and (3) Constituent Enhancement Rule

Buffer Rule (Effective Since Inception)

In order to avoid frequent change of constituents, set at a 5% buffer zone for market capitalization. It means that, in terms of adjusted market capitalization, only when the sum of constituent's weights is below 75% will it need reconstitution.

Constituent Enhancement Rule (Effective Date: 6th January 2020)

If there are more than one cryptocurrency which shall be selected as the new constituents, a reconstitution will now be conducted to include the new constituents with bigger market capitalization while meeting the liquidity screening requirement.

(3) Constituent Enhancement Rule Example

#	Crypto	Rank (2020Q4)	Rank (2021Q1)
1	Bitcoin	1	1
2	Ethereum	2	2
3	XRP	3	6
4	Bitcoin Cash	4	8
5	Litecoin	5	7
6	Cardano	8	3
7	Bitcoin SV	9	12
8	EOS	10	13

#	Crypto	Rank (2021Q1)
1	Bitcoin	1
2	Ethereum	2
3	Cardano	3
4	Polkadot	5
5	XRP	6
6	Litecoin	7
7	Bitcoin Cash	8
8	Stellar	9

Bitcoin SV and EOS were low ranked for market cap during previous review

With 2 constituents falling in rank, a reconstitution was employed to add 2 new coins (Polkadot and Stellar) to fulfil the criteria

(4) Fast Entry Rule

New cryptocurrencies will be added if it meets both requirements listed below for 5 consecutive days:

Daily Trading Volume ranks in top 2 across all cryptocurrencies

Market cap is more than 30% of the total cryptocurrency market cap

Index Distribution

- Daily Index will be published at 12:00 noon HKT every working day
- Real-time Index is disseminated every 5 seconds
- Real-time Index dissemination is available 24x7
